1. Organization Overview

Target Organization:

Name: Bakery (Sweet Girl Bakeries)

Pic: Bakery aesthetics

History: Bakery opened in August 2020. This was during the covid times when it was a huge risk to be in contact with people but mostly it was a huge risk for the business. A business opening during the scary times of covid was an almost certainty that it would fail but it didn't. Because of the people who believed in it (the customers) and the cause behind it. Sweet Girl Bakeries is a business that opened during woman's month in South Africa, August. It acted as a love letter that the owner Nelisiwe Majola wrote to all the woman and children in South Africa after the death of another woman, Uyinene Mrwetyana. Studies have shown that 40% of woman in South Africa have experienced sexual assault in their lifetimes and that is why 40% of the proceedings of Sweet Girl Bakeries go towards woman shelters in South Africa that help woman that have been victims of abuse to safely start their lives again.

Mission Statement: The mission of this organization is to provide sweet treats to the community while affording people the opportunity to contribute to a cause that affects us as a country. Homeless shelters for woman who have been abused will receive funding to help them function as an NGO.

Vision Statement: The Vision of this organization is to expand and in doing so help many more woman in South Africa. Opening more stores in South Africa would be a great growth for the company's future as it will be growing all over South Africa and making more profit. This profit will be able to be used as funding and donations to many woman's shelters in South Africa and this will one day lead to a long-term goal for the company which is to be able to expand to other countries that have similar problems to South Africa. Because woman in oppressed and abusive situations is an epidemic that not only affects South Africa.

Target Audience: People who are looking to help contribute towards the problem of gender-based violence in South Africa who also happen to have a sweet tooth.

2. Website Goals and Objectives:

Website goals: Goals for this website include selling products. The baked goods that will be sold are the objective of the organization while also informing the customers about valuable information of the state of gender-based violence in South Africa. This way customers will purchase with confidence that their money is not only providing them with a sweet treat but also going towards a good cause.

Website objectives:

-Building trust and creating a brand identity: The bakery will stand out by its origin story and sharing the motives behind and its existence and the impact it plans to have in the community and future of South Africa at large.

-Displaying the menu: Then the menu should show the items that the bakery has to offer and that will inform customers of the variety that there is. The bakery then should update when menu items are changed due to change in seasons and the addition of seasonal menu items.

-The ability to take the enquiries from customers and implement them: It is very important to the organization that this business is successful. The customers are the reason that the bakery is operating successfully and thus it is the organization's responsibility to ensure that their enquiries are heard and they are considered every step of the way.

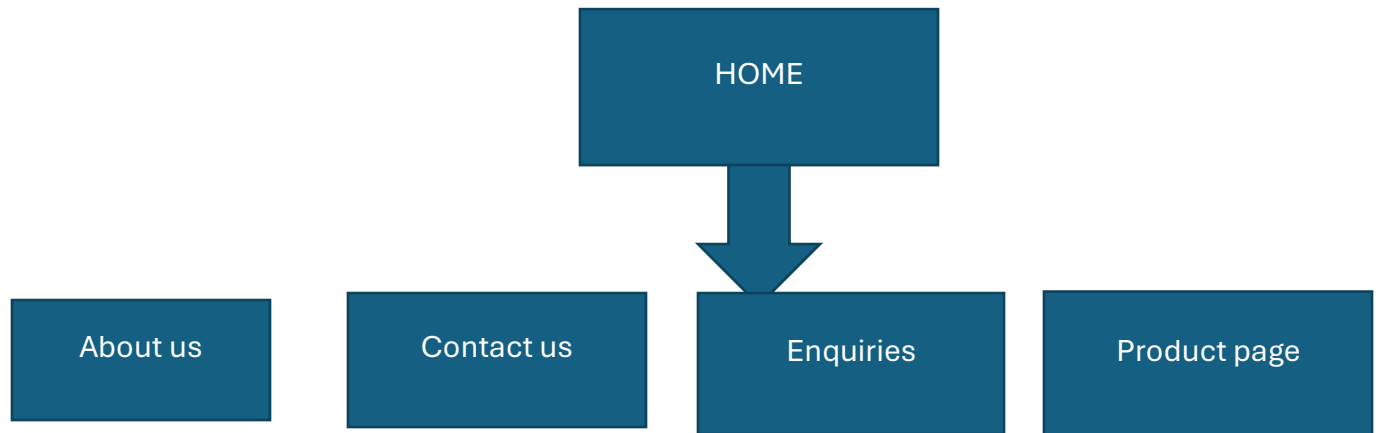

-Improving visibility of the business: Ensuring that the business is visible to the world and easy to find on the internet. Key words are essential in online visibility to ensure that when those keywords are used, the website will be ranked higher on the search results that pop up.

Key Performance Indicators: Measuring success for this website will be determined by

- Increased Website traffic: This will indicate to the marketing team that the demand for the company is growing, and more attention is being drawn to the business and the cause behind it. This will be an indicator of potential customers as well as the word of the business being spread.
- There are Operational Key Performance Indicators that work with the time and performance of a company during a specific timeframe. These include data that shows the incline or decline of revenue in the business and which product is the cause so that the company will know that less of those specific delicacies should be baked and if there is an incline the product that is the source of this incline will be baked more. In this way the company

ensures to maintain a good stream of revenue while simultaneously listening to the customers.

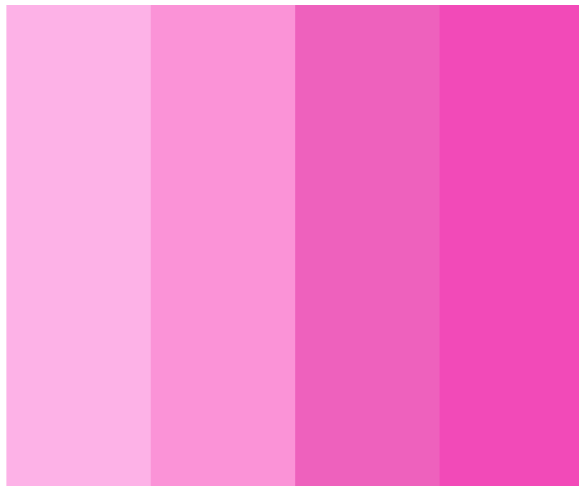

4. Proposed Website Features and Functionality

5. Design and User Experience:

The design and aesthetic of the organization will be very feminine as the business is a way for woman to be supported and seen. The theme of the website will be pink as well as light colors to represent softness and femininity, and it will have very feminine fonts such as Baguet Script. The typography includes the font: Baguet Script as well as hierarchy – getting the viewer’s attention with bigger letters (H1) and fonts such as bold and italic to ensure that specific information that the organization deems important or what they want to stand out to the viewer. Layout of the website will include the visible buttons that will act as easy accessibility to the other pages. This will ensure easy navigation throughout the website.

Color pallet for website:

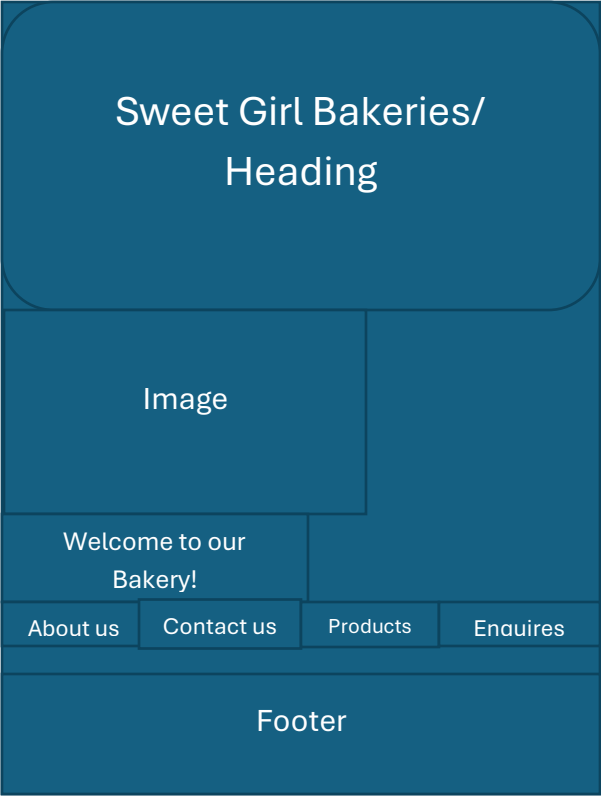

Typography for the website is:

Font-family: Cambria, Cochin, Georgia, Times, 'Times New Roman', serif.

Font-size of buttons: 5px

Wireframe for website:

6. Technical Requirements:

Hosting requirements include Storage Space that is used to store web files and media that belong to the organization. Ways to store the data of the company will need storage space. It is crucial to have bandwidth as it allows many people to visit the website without crashing.

Domain name requirements include uniqueness as the name cannot be an existing name. It must be a name that no company or person has a legal right to. Fees must be paid yearly to maintain the rights to the name.

Performance and accessibility: The website will be made more accessible with the improvement of the visibility of the website. This will allow more people to access the website with their ability to easily access it. The goal of the website is to have high performance by ensuring that it responds quickly to user interaction and this essential as the website is selling a product, so responsiveness is of the utmost importance.

Security and Compliance: the security of the website is essential in order for the website to be protected digitally, and tools such as firewalls are used to achieve this. According to RCCI Webmaster (2025), cyberattacks and data theft are something to be weary of. The compliance of a website is there to ensure that the business respects their customers and their rights such as their POPIA rights, which is a customer's right to privacy and ensures that organizations use, collect and store data responsibly.

Functional Integrations: The website for this business needs to have functional integrations as it deals with customers who may have different ways to pay, and that evokes a need for versatility in this area. Payment options need to be made available for customers, and this is why payment options are one of the key types of functional integrations. Payment options such as Apple pay will then be connected to the website. The tracking of the analytics of the website clarifies where certain issues may be such as certain products not performing as well as others or the enquiries of customers building and that showcases the global issues that may be experienced by customers on their end, throughout different devices. According to Thirstcreative.com.au. (2021). Tools such as Google Analytics can be connected to the website to properly monitor and keep in order with the analytics of the website.

Ongoing maintenance: After the website has been launched then it will then need routine checking as it will need to be carefully maintained. Routine checkups are needed for keeping the website up to date and ensuring that the software is always updated, and backups are regularly implemented for the website to have efficient functionality.

Proposal 2

Table of contents:

1. Organization Overview

Target Organization: An NGO

Name: Bloom Foundation

History: According to South African Statistics Approximately 7 million girls miss school due to period poverty. Sanitary products are essential but unfortunately, they are not affordable for girls who come from less fortunate backgrounds. That need is where the Bloom Foundation was born. The Bloom foundation celebrates girls who are growing and like flowers; they bloom. This is something that they do not need to be ashamed of but instead proud of. The Bloom Foundation provides sanitary products to underprivileged schools all over South Africa. This way girls are not neglected in their struggle with period poverty.

Mission statement: Bloom Foundation looks to expand working with NGOs all over Africa in ending period poverty in their respective regions as well as in countries that are experiencing war. Young girls mature whether they have the means to grow comfortably and growing up comfortably is something that will not be the reality of a selective few girl.

Vision: The Bloom Foundation believes in the future of girls from all different types of backgrounds. That they all deserve to have access to a bright future without any setbacks. Girls from underprivileged backgrounds already have to deal with their economic setback in life that could discourage them from going after their dreams but a discomfort in growing up and maturing as young woman makes them too embarrassed to go to school and then they miss crucial hours of school, ultimately setting them back. Some cases are so bad that girls drop out of school. Bloom Foundation sees it to ensure that girls will be in environments that encourage learning while accommodating them and their natural growth. Girls having access to sanitary products at school will encourage attendance, and girls' absenteeism will decrease, and their marks and pass rates will increase.

Target Audience: People who would like to donate sanitary products to the organization and would like to volunteer.

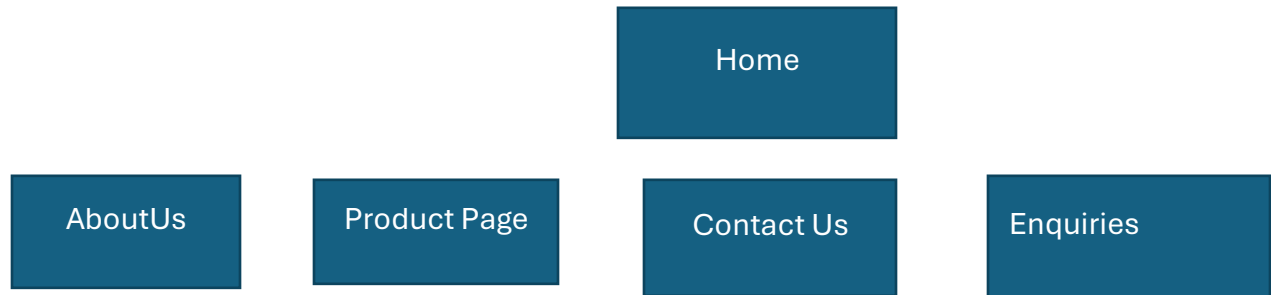

2. Website Goals and Objectives

Website Goals: The Goal of this website is to inform the public about important information about period poverty and how it affects girls and their education. It will also include information that will help the public to be a part of the movement of ending period poverty by volunteering or donating sanitary products.

Key Performance Indicators:

- Increased website traffic- tells us that more people are being informed about our cause and our number of volunteers and donators will be increased.
- Operational Key Performance Indicators – Will include the success of the business in a short time frame which will be determined by how many schools Bloom Foundation will be able to donate to and offer their services to.

4.

5. Design and User Experience:

The website will be red and white to stay in the theme of period poverty. The words that will stand out will be ones in the biggest writing (h1). The Layout will include the information for the viewers to be informed on, and it will have easy navigation. Buttons that lead to options if the viewer wishes to donate or volunteer.

6. Technical Requirements:

Hosting requirements include Storage Space that is used to store web files and media that belong to the organization. Ways to store the data of the company will need storage space. It is crucial to have bandwidth as it allows many people to visit the website without crashing.

Domain name requirements include uniqueness as the name cannot be an existing name. It must be a name that no company or person has a legal right to. Fees must be paid yearly to maintain the rights to the name.
